

The Radia R-17i from BG is an innovative high-performance on-wall loudspeaker featuring the company's patented planar ribbon technology. An elegant two-way design, this LCR utilizes twin 4" woofers, two 4" passive radiators and a Neo3PDR planar ribbon tweeter. The R-17i is easy to drive and compatible with any high-quality amplifier or a/v receiver.

With its wide horizontal dispersion and flexible placement, the R-17i is ideally suited for LCR applications in home theater or to simply complement flat on-wall TVs. This stylish loudspeaker is capable of providing incredible detail, solid imaging and high-level dynamics, producing sound with stunning realism. The R-17i delivers excellent performance while eliminating the clutter of a freestanding speaker or the expense and commitment of an in-wall.

The wide horizontal dispersion pattern creates a large "sweet spot" for flexible placement of the speaker as well as the listener. Rather than a limited location for an audience of one or two, a larger sweet spot allows a group of listeners to enjoy the planar ribbon's precise imaging with exceptional detail.

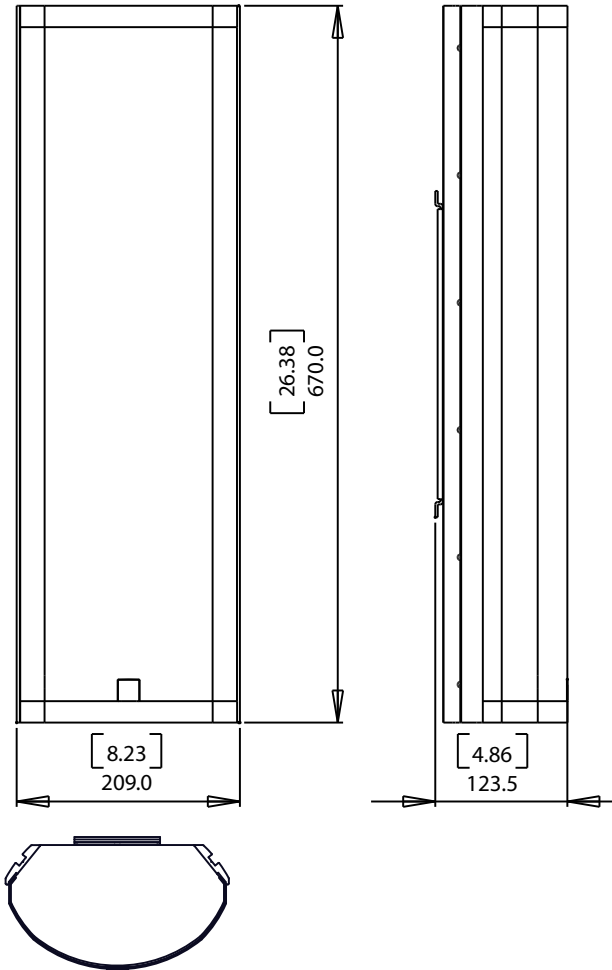

- > **Attractive** World class industrial design complements the finest interiors. Offered in Silver or Black finishes.
- > **High performance** Patented BG planar ribbon technology delivers amazing clarity and lifelike imaging.
- > **Flexible placement** Wide horizontal dispersion creates wider sweet spot than conventional speaker technology.

The R-17i is easy to mount and install. The rear of the enclosure features a “keyhole” mounting plate and comes supplied with a versatile wall bracket for horizontal or vertical mounting. In addition, the ribbon tweeter can be rotated, allowing for either horizontal or vertical use for a wide variety of home theater arrangements.

The critically-acclaimed R-17i combines a symmetrical array with unique driver technology that delivers performance that sounds as impressive as it looks.
