

**An elegant and stylish performer**, the award-winning Z Series by BG is equally adept at delivering astonishing home theater sound as well as faithful two-channel music. Using several innovations, such as planar ribbon technology, the Z Series effortlessly and accurately reproduces the quiet, silky sounds of a classical guitar, the hushed whispers of the human voice and the high-impact sound from Hollywood movies, making it a favorite with today's leading designers. Meticulously constructed with a reinforced cabinet from the finest hardwoods, the Z Series is a remarkable speaker system for the eyes, as well as the ears.

As with all our loudspeakers, the Z Series is crafted from the finest materials with zero tolerance for error and a maximum desire for discrete high fidelity. The Radia Z Series can turn even modest multi-channel (2-channel to 7.1-channel) home theater into a powerhouse of music and sound. The detail and accuracy in a high-performance planar ribbon-based speaker system must be heard to be believed.

By combining proprietary ribbon technology with aluminum cone woofers, the Z Series offers unparalleled transparency, resolution, clarity and tonal accuracy. The award-winning Z-Series offers high performance and quality craftsmanship at affordable prices. Critics around the world have hailed them as a remarkable value and you will too.

- **Lifelike** Exclusive planar ribbon technology produces a smooth, open soundstage regardless of listening position or room acoustics.
- **Seamless** Linkwitz-Riley crossovers with linear air core inductors and high-quality polypropylene capacitors integrate seamlessly with woofers and tweeters for smooth, natural response.
- **Ultra-reliable** Patented planar ribbon drivers provide superior efficiency and power handling for years of trouble-free listening.

All models available in Cherry or Black Ash finish. ➤
